(54) Title: CAN FOR BULK PRODUCTS

(57) Abstract: A can for bulk products, comprising: a tubular body (10) in metallic sheet, having at least one peripheral lateral wall (11) and one annular upper wall (12) presenting an external edge (12a) affixed to the peripheral lateral wall (11), an internal face (12b) turned to the interior of the tubular body (10) and an internal edge (12c) defining an opening (13); and a lid (20) to be removably fitted and retained in the opening (13) of the can, in order to close it. According to the invention, the annular upper wall (12) has any point of its internal face (12b) disposed at a height, measured in the interior of the tubular body (10), at minimum equal to the height of another point of said internal face (12b) which is disposed in a radially external manner, aligned and adjacent in relation to said point.
